JEM Newsletter: # 2

February 19, 2010

Greetings!

Thank you for taking the time to read JEM's February Newsletter, featuring Custom Medical Cable Assemblies. JEM has recently achieved its ISO 13485:2003 certification to manufacture medical devices. As a result of achieving this certification, JEM recently issued a press release for the various custom medical cable assemblies it manufactures. This press release will appear in various media outlets throughout the next few months. Please read on to learn more about ISO 13485: 2003 and to read JEM's Custom Medical Cable Assemblies press release.

Medical ISO 13485: 2003

To become certified in ISO 13485, a quality management system must demonstrate its ability to provide medical devices and related services that consistently meet customer requirements and regulatory requirements applicable to medical devices and related services. JEM's Quality System successfully met the requirements of ISO 13485: 2003 during the auditing process and received its certification in January of 2010. JEM Electronics is currently certified to meet the standards of ISO 9001: 2008, TS 16949: 2002, and ISO 13485: 2003.

Custom Medical Cable Assemblies Press Release

Custom Medical Cable Assemblies: Manufactured for Inside and Outside the Box

If you need custom medical cabling for inside and outside the box instrumentation, equipment, and monitoring devices, check with JEM Electronics Inc. of Franklin, Massachusetts. Practicing lean manufacturing and Six Sigma, they are certified to meet ISO 9001, ISO 13485 and TS 16949 standards.

JEM Custom Medical Cable Assemblies are manufactured to specification for a wide range of applications including diagnostics imaging equipment, medical instrumentation, surgical devices, and patient monitoring. Built to Six Sigma reliability, they can incorporate control, power, and communications wiring with

various insulation materials, fine crimped terminations, and popular connectors such as Amphenol®, Fischer®, Lemo®, Molex® and Tyco®.

Offered in prototype to production quantities, JEM Custom Medical Cable Assemblies are RoHs compliant and 100% individually tested. To ensure that a high standard of workmanship and quality are maintained, JEM trains and certifies its personnel to the latest IPC standard (IPC-A-620).

JEM Custom Medical Cable Assemblies are priced according to configuration. Price quotations are provided upon request.

For more information on custom medical cable assemblies or other custom cable assemblies, please contact JEM at info@jemelectronics.com or 508-749-3569. You also can visit our website at www.jemelectronics.com.

In addition, you can shop for standard fiber cables, armored fiber cables and other network cables from JEM Cable & Fiber, a division of JEM Electronics, at www.jemcables.com.

Best regards,

Tasha Ellis
JEM Cable & Fiber Operations Manager
